Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 3-7 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morriss 20030074021 in view of Green 4994073.

Regarding claim 1: Morriss discloses an endoprosthesis made from biological polymer with a textured cover 100 and having protrusions in the form of conical barbs 208 that can be flexible and elastic (p. [0121]) and having sharp ends (p. [0002]). Morriss also discloses the arrangement and interval between the barbs varying with application (p. [0020]).

Morriss does not distinctly disclose the elevation of the protrusions in the range of 0.01 mm to 5mm (Col. 12 ll. 14-16).

Green discloses protrusions of a length of about 0.167 inches, which is within the specified range.

Art Unit: 3709

It would have been obvious to one having ordinary skill in the art at the time of the invention to combine the protrusions of Morriss with the length of Green in order to penetrate the tissue sufficiently allowing a firm setting as taught by Green (Col. 5 ll. 10-16).

Regarding claim 2: Morriss further discloses the barbs being oriented in the same direction and in staggered order (Fig. 5A).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory A. Anderson whose telephone number is (571) 270-3083. The examiner can normally be reached on Mon-Thurs 9:30am-3:00pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ehud Gartenberg can be reached on (571) 272-4828. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
